Input today's news

You must fill all fields to send a piece of news. Proof-read what you wrote before sending. You cannot remove a sent piece. You can submit a corrected one. For each day only the last one will be counted.

The news must be at most one day old. If it was not published ☒ **today**, check ☐ **yesterday**

What is the piece of news about? This is important for readers. Pick what is most characteristic and new in the news.

- ☐ Vulnerability (observed weakness, threat, concern—not yet (widely) exploited)
- ☐ Incidence, offence (attack, accident,...)
- ☐ Offender, consequences (culprit, costs, convictions,...)
- ☐ Improvement (software, hardware, awareness, legislation,...)
- ☐ Other (probably something neutral, but also research results, policies, if they are not clearly improvements.)

What kind of source are you referring to?

- ☐ General purpose news media (in English)
- ☐ Web site specializing in security (in English)
- ☐ Local, non-English, newspaper for general public
- ☐ Local, non-English, security web site
- ☐ Other

The news condensed by you into 40 to 100 words that you believe will teach something to other students of this course. In the end add a remark about the source language if not English like this: [Finnish].

The source. (i) **Name** of publication (site or newspaper), (ii) **Title** of the article, if not already in the URL, (iii) **Author** (or anonymous), If web then, (iv) **http://...**
